## CHECKLIST OF THE BIRDS OF CAPE COD

PUBLISHED BY THE CAPE COD BIRD CLUB © 2021

This checklist contains 336 species that have been recorded more or less regularly on Cape Cod over the past decade. The taxonomic sequence follows the 7th edition of the American Ornithologist's Society's *Checklist of the Birds of North America* (1998) and subsequent supplements. Each species' status through the seasons is shown by means of a bar graph.

## KEY:

- Abundant and widespread; easily found and often in very large numbers.
- = Common; easily found in the proper habitat.
- = Uncommon and/or local; generally seen only in small numbers or within very restricted habitats.
- = Rare but regular; recorded every year but usually hard to find.
- ••••• = Very rare and irregular; not seen every year.

## CODES:

- \* = Breeding confirmed since 2015.
- + = Breeding suspected but not confirmed.
- E = Erratic; numbers highly variable from year to year.
- P = Pelagic; checklist indicates status near shore, including Stellwagen Bank, rather than offshore.

Report sightings of any rare species to:
Wellfleet Bay Wildlife Sanctuary, Wellfleet (508-349-2615)
Birdwatcher's General Store, Orleans (508-255-6974)
eBird (www.ebird.org)
